The following is an examiner's statement of reasons for allowance:

#### ***Regarding claims 1-4, 7, and 8***

Claim 1, and claims 2-4, 7, and 8 via dependency, state the limitations "wherein each of said plurality of interstitial bridge pads is coaxial in a z direction with said corresponding first blind via and with said corresponding second blind via" and "said corresponding first capture pad and said corresponding second capture pad each have a diameter less than a diameter of said interstitial bridge pad therebetween". These limitations, in conjunction with the other claimed features, were neither found to be disclosed in, nor suggested by, the prior art.

#### ***Regarding claims 18-20***

Claim 18, and claims 19-20 via dependency, state the limitations "wherein each pair of opposed coaxial blind vias in said dual blind via interconnection unit are coaxial "

Art Unit: 2841

and “each of said corresponding pairs of capture pads have a diameter less than a diameter of a corresponding one of said bridge pads”. These limitations, in conjunction with the other claimed features, were neither found to be disclosed in, nor suggested by, the prior art.

**Regarding claims 40-50**

Claim 40, and claims 41-50 via dependency, state the limitation “wherein said each of said bridge pad is coaxial in a z direction with a corresponding one of said first blind via and with a corresponding one of said second blind via” and “said corresponding first capture pad and said corresponding second capture pad each have a diameter less than a diameter of said bridge pad therebetween”. These limitations, in conjunction with the other claimed features, were neither found to be disclosed in, nor suggested by, the prior art.

**Regarding claims 51-54**

Claim 51, and claims 52-54 via dependency, state the limitations “wherein said interstitial bridge pad is coaxial in a z direction with said first blind via and with said second blind via and wherein each of said interlayer interconnection units include coaxially formed corresponding first blind vias and second blind vias” and “said corresponding first capture pad and said corresponding second capture pad each have a diameter less than a diameter of said interstitial bridge pad therebetween”. These limitations, in conjunction with the other claimed features, were neither found to be disclosed in, nor suggested by, the prior art.

**Regarding claim 55**

Claim 55 states the limitations “wherein each pair of opposed coaxial blind vias in each of said plurality of interlayer interconnection units are coaxial, said pair of opposed coaxial blind vias extend from a corresponding pair of capture pads” and “each of said corresponding pairs of capture pads have a diameter less than a diameter of a corresponding one of said bridge pads”. These limitations, in conjunction with the other claimed features, were neither found to be disclosed in, nor suggested by, the prior art.

**Regarding claims 56-57**

Claim 56, and claim 57 via dependency, state the limitations “wherein each of said plurality of bridge pads is coaxial in a z direction with said first blind via and with said second blind via” and “said corresponding first capture pad and said corresponding second capture pad each have a diameter less than a diameter of said bridge pad therebetween”. These limitations, in conjunction with the other claimed features, were neither found to be disclosed in, nor suggested by, the prior art.

**Regarding claim 58**

Claim 58 states the limitations “wherein each of said plurality of bridge pads is coaxial in a z direction with said first blind via and with said second blind via” and “said corresponding first capture pad and said corresponding second capture pad each have a diameter less than a diameter of said bridge pad therebetween”. These limitations, in conjunction with the other claimed features, were neither found to be disclosed in, nor suggested by, the prior art.
